The United States surpassed 18 million reported COVID-19 cases on Monday, figures from Johns Hopkins University showed, as the virus surges nationwide.

The US has the world's highest absolute number of cases as well as the most deaths related to the [virus](#), according to the figures.

It had a total of 18,006,061 reported cases on Monday evening and more than 319,000 deaths.

The country began administering vaccines a week ago and has given approval to immunizations developed by Pfizer-BioNTech and Moderna.

States and cities have imposed varying levels of restrictions in a bid to slow the virus spread, but outgoing President Donald Trump has repeatedly downplayed its seriousness and urged reopenings.

Trump's behavior has come despite having been hospitalized with the virus himself.

President-elect Joe Biden, who defeated Trump in the November 3 election, has been far more
